POINTS TO BE CLARIFIED ON SSD RE CADROIT

1. The great majority of information received from CADROIT by BOB concerning SSD leads and information has been confined almost exclusively to the old Hookwald material.

2. Our definite feeling is that command status in CADROIT must be clarified and solidified:

a) Is ☐ in charge or is ☐ in charge? In either case the responsible officer must be briefed by the CADROIT case officer to the effect that CARBOHYDRATE is to receive the fullest cooperation from all personnel of CADROIT.

b) In particular, Section Chiefs must be told, and held responsible, for having members of their section who talk to visitors instructed to ask all visitors the following basic questions:

- 1) Do you know anything about the SSD - location, disastelles, addresses, personnel, safe houses, etc.
- 2) Do you know any members in your town of the SSD?

3. In order to foil all any attempt by CADROIT that this will unnecessarily bog down their routine, it should be emphasized that these section members need not take any notes or do the debriefing themselves but need only refer their visitor to the appropriate section, assuring that they answer yes to any of the above questions. The end of the exercise and cannot be too heavily burdened by the exercise.

4. It is because of this that CARBOHYDRATE cannot himself handle the flow of visitors in order to successfully extract pertinent information, he will be brought to simply refer these visitors to ☐ office located in the neighborhood of CADROIT.

5. Concerning the letters written to individuals in the East Zone, we would like to have CAIROIT send form letters to SSD members whose names will be furnished to CAIROIT by BOB. It is essential that there is included in these letters a request for the individual addressee to come to CAIROIT headquarters and that, upon their arrival, they are brought to CARBOHYDRATE's immediate attention.

6. As a point of consideration, can Mitarbeiter be used to make spot phone calls of a "form" nature to selected SSD personalities for defection purposes?

7. It is our understanding that CARBOHYDRATE's primary functions in CAIROIT are the following:

- a) As security officer for CAIROIT, to insure the internal security of CAIROIT headquarters personnel and their activities.
- b) Insofar as practical, to oversee the operational methods employed by CAIROIT and to make criticisms and corrections as he deems necessary. This to be done in consultation with [] [] [] [] []
- c) To see that all operational leads to individual SSD officers and their installations, modus operandi, etc, are immediately furnished to BOB CART section.

8. It is our impression that there is not, at the present time, a clear chain of command in CAIROIT. If this impression is correct, we urge that this deficiency be immediately corrected. We also wish to have Chief CAIROIT eliminate any lingering doubts in the minds of CAIROIT personnel as to the function and authority to be exercised by CARBOHYDRATE.

9. As a point of discussion, what is the CAIRAIN opinion as to the

responsibility of BOB CART concerning the actual operations of CADROIT. Are we to be held responsible for ensuring secure mounting and running of the CADROIT operations into the East Zone and East Berlin, or does our responsibility end with ensuring that the internal methods of CADROIT headquarters are securely organized and carried out?
